į	digited number of collisted men wore no estyle uniforms.		
5	in 6 December 1952, on estimated 3,500 VPs occupied the Infentry Barrack: the Loebus. About three fourths of the men were new-style uniforms with dark-green, dark-rod and black patches. The unit was commanded by a blookeanse colonel who were dark-blue service color with two golden stars will who also were a nedal, with a waving red flag.		
19 °	On 22 November 1952, the VP Camp Funnfeicher near Neubrandenburg was excepted by an estimated 1.000 to 1.200 men including a relatively large maker of young officers. Nost of the TPs were black, and a few red or green service color on their patches the installation was a training camp whose men were transferred, from time to time, to the largestn area, but was were regularly replaced by new regruits groups of 10 to 20 civilians, who arrived by trait and were picked up by VP trucks the constructof permanent brick buildings was started in the camp.	m	25X1 25X1 25X1 25X1
ೆ.	building materials were actually shipped to WhederThnow, where a police school was allegedly being establish the hotel opposite the ship hoist.	ıd	25 X 1
9. [the VP camp at Miederschlag-Hutweide near Annaberg was occupied by an estimated 1,300 men. The camp at Matseide was recently obseed under the corrand of a Soviet commander, to whom four other office were assigned. There were 21 T-34 tanks at the camp. The unit at the miederschlag installation was believed to have nine 7.62-xm AT guns and no other heavy weapons. The VP installation was recently guarded by a double ring of sentries. At moon on 24 October, about 400 VPs held attack practices at squad level beside the road. A number of VP-officers' dependners already quartered in the Nielerschlag installation.	: ;8	25X1
10.	the barracks buildings of the formone at Potedan-Siche, which had been completely destroyed, were unconstruction. One barracks building was reconstructed, and another was completed. The installation was guarded by VPs wearing old-style blue uniforms and, in contrast with the Schutzpolizei, crossbelts.	or t	25X1 25X1
Section 20	On 2 December 1952, 2,700 to 3,000 VPs wearing dark-blue service color occupied the Fusileer Barracks on Kopernikus Strasse at Rostock. They allegedly were tank or technical units. They were commanded by Colonel Rissel (fnu), whose chief of staff was one Follack (fnu). About 300 men occupied new low buildings near the barracks installation.		
12.	On 8 November 1952, the former Grensdier Barracks on Werder Strasse at Schwerin was occupied to capacity by about 2,000 KVPs. They were mainly new-style uniforms and visor-type service caps with light-blue cap bands.		
13.	On 5 December 1952, troops of the National Forces (also called the people army) occupied the old Grenadier Barracks at Schwerin, which was vacated by the last civil agencies. 130 officers and about 1.50		25 X 1

SECRET

SECRETA

25X1 sen were actually located in the barracks installation. The enlisted men wore red-bordered epaulets, which were the same color as the uniforms. The troops were allegedly equipped only with rifles and machine guns. They received indoctrination, held drill practices and training in marksmanship and combat. The unit allegedly included an unidentified number of Soviet instructors, who spoke fluent German. 10 On 10 November 1952, a new VP camp was under construction south of Storkow. It was enclosed by a high board fence and guarded by sentries on watchtowers. The completed permanent low buildings of the installation had a capacity of 2,000 mem. There were numerous other low buildings which were still under construction. 1 25X1 1.9 Comment. The Infentry Officer Candidate School 25X1 a cadre located in the barracks installation on Petersberg rmit, is located in the Henne Kaserne. In early November, this unit may have been filled up with recruits, However, it appears doubtful that 200 Soviet In early November 1952, 25X1 coldiers should have been assigned this cache unit had a size of about 1,300 man. Comment. Glauchau may become a KVP post. 25X1 a cadre division. Comment. This installation quarters the capacity of the installation was about 1,500 new in late September 1952. 25X1 Comment. No previous reports included clear statements on the actual the barracks strength of the KVFDs Leipzig I and II. 25X1 installations of the KVFD Leipzig I on Olbricht Strasse and Viertelsweg were occupied by a larger number of VPs than the barracks installation of the MYFD Leipzig II on Schumenn Strasse. Comment. A previous report stated that the Loebau post includes, 25X1 one VP infantry regiment of the Prenzlau division which was transferred from the Torgelow area to winter billets in Loebau 25X1 Comment. In the summer of 1952, an untilentified number of personnel Fuenfeichen, and used as were reassigned from a nucleus of a unit around which engineer units of the Armeegruppe Word were to be activated. It is believed that one engineer battalion was moved from the Eggesin area to winter billets at Fuerreichen. Hence, no rajor reassignments to Eggesin are expected during the winter. Comment. It is still undetermined to what major unit this VP unit 25X1 balongs.

DECEMBER!

SECRET/ 25X1 25X1 8, Comment. It is believed that the construction work is done by the Raumion Potsdam and the installation is to quarter SSD units. 25X1 9. Comment_e a cadre division, is located in the Fusilter Barracks. this unit numbered about 1,500 men in early October 1952. At that time, the unit was commanded by Lieutenant Colonel Fluhr (fnu), whose chief of staff was Major Kowel (fnu). 25X1 10. Comment. A unit of the Armsegruppe Nord is believed to be located in the Grensdier Barracks in Schwerin. 25X1 the 1st Mecz Regt of the Eggesin Mecz Div was moved to winter billets in the area of the KVPD Schwerin-Sternbuchholz in late October 1952. The majority of this regiment is believed to have been billeted at Schwerin. Il. Corment , an engineer unit subordinate 25X1 directly to the HVKP, is located in the Storkow area. It is believed that the billeting area of this unit is being enlarged.
